**About The Signals Network (TSN)**

[The Signals Network](#) (TSN) is a US 501(c)(3) non-profit organization with international operations. The organization provides holistic and individualized support to whistleblowers who have shared public interest information, including legal, psychological, safe housing and advocacy support.

To support whistleblowers and hold power to account, The Signals Network has developed an end-to-end approach that includes: **empowering** workers to stand up to power and speak out about wrongdoing; **protecting** whistleblowers who contribute to published reports of wrongdoing; supporting collaborative **investigative reporting** on wrongdoing; and, advocating for lasting **change** as a result of whistleblower revelations.

The Signals Network actively supports dozens of whistleblowers globally as they report on wrongdoing and fight for lasting change. These courageous individuals have provided information on the biggest media stories of our time to a range of international media outlets, including Big Tech data violations and government and corporate corruption, #MeToo abuses, political propaganda online, health hazards and more. Their information has appeared in *The New York Times*, *The Washington Post*, *The Guardian*, *Time*, *Le Monde*, *BBC*, *Der Spiegel*, *The New Yorker* and more. We have coordinated the publication of major investigations through media in the U.S. and across Europe that reached tens of millions of readers. Recently, we provided protections for whistleblowers in Africa as part of a major report in [Time](#) magazine on Facebook's content moderation system, in Europe as part of Uber's labor practices and lobbying efforts, and in the US as part of Twitter's business practices. More information is available on our [website](#).
